Principal Investigator:	Date:	
OHEEN'S HNIVERSITY BIOLOGICAL STATION		

USER CHEMICAL LIST		
Chemical Name	Supplier	Quantity

Safe storage, handling and disposal procedures for all chemicals and biohazards will be discussed with the Manager on arrival. Researchers are responsible for their own permitting although it must comply with Queen's regulations. MSDS Sheets must be made available in the binders at entrance of each lab and must not be more than three years old. Every effort must be made to minimize on-site chemical use and storage. Chemical and lab safety are paramount concerns for PIs and QUBS Staff.
