

Application for Biology Undergraduate Summer Awards to Conduct Field Research at the Queen's University Biological Station or Undertake Field Courses

This common application pertains to four summer research awards that are listed below. Each has specific criteria and conditions that can be found at: <https://qubs.ca/awards>. You will be considered for any of the four awards that are deemed appropriate based on the description of your activities. These awards are typically to be used to help: 1. Cover room & board at QUBS, 2. Provide some stipend support for the candidate, and 3. Cover field research expenses. Please note that the Huntley Award is distinct in that it can be used for field research or to help offset costs of a field course.

The Wes and Dorletta Curran Memorial Award (for research in aquatic biology) - awarded based on both financial need and academic excellence. By applying for this award, you authorize QUBS to contact the Office of the University Registrar (Student Awards) to confirm my eligibility for the required financial need component of this award.

J. Allen Keast Lake Opinicon Undergraduate Research Fellowship (independent research at QUBS)

The Alexander and Cora Munn Summer Research Award (research in conservation biology or environmental preservation)

The Kingston Field Naturalists' Award (research in conservation biology or natural history).

Karen Huntley Memorial Award (field course or field research in conservation, environmental biology or sustainable forestry)

Please submit your 4-page application to our undergraduate admin assistant:

Email: ug.biology@queensu.ca

Applications close March 31st 2022

Results will be announced April

Enquiries: Dr. Stephen C. Lougheed, Director, Queen's University Biological Station

Email: steve.lougheed@queensu.ca

Briefly describe your career goals & why you would like an opportunity to conduct field research at QUBS (for the Huntley, how a field course will help you realize your goals).

Describe the leadership qualities that you possess and achievements that showcase them. In particular discuss those relevant to conservation, ecology, environmental science, field research, or science outreach.

Outline your proposed activities/research at QUBS. Please ensure that your proposal aligns with the mandated activities of at least one of the QUBS awards.
