

Application for Biology Undergraduate Summer Awards to Conduct Field Research at the Queen's University Biological Station or Undertake Field Courses

This common application pertains to six summer research awards that are listed below. Each has specific criteria and conditions that can be found at: <https://qubs.ca/awards>. Two (Huntley and Chinese Alumni) can also support participation in a field course. You will be considered for any of the the awards that are deemed appropriate based on the description of your activities. These awards are typically to be used to help: 1. Cover room & board at QUBS, 2. Provide some stipend support for the candidate & 3. Cover field research expenses. The Huntley and Chinese Alumni awards can be used to cover the costs of field courses. Amounts of these awards vary among years.

The Wes and Dorletta Curran Memorial Award (for research in aquatic biology) - awarded based on both financial need and academic excellence. By applying for this award, you authorize QUBS to contact the Office of the University Registrar (Student Awards) to confirm my eligibility for the required financial need component of this award.

J. Allen Keast Lake Opinicon Undergraduate Research Fellowship (independent research at QUBS)

The Alexander and Cora Munn Summer Research Award (research in conservation biology or environmental preservation)

The Kingston Field Naturalists' Award (research in conservation biology or natural history).

Karen Huntley Memorial Award (field course or field research in conservation, environmental biology or sustainable forestry)

China Alumni Scholarship (support of Chinese international students taking a field course or undertaking field research at Queen's University Biological Station)

Please submit your 4-page application to our undergraduate admin assistant:

Email: ug.biology@queensu.ca

Results will be announced mid-April

Inquiries: Dr. Stephen C. Lougheed, Director, Queen's University Biological Station

Email: steve.lougheed@queensu.ca

Briefly describe your career goals and why you would like an opportunity to conduct field research at QUBS (or take a field course if appropriate).

Describe the leadership qualities that you possess and achievements that showcase them. In particular discuss those relevant to conservation, ecology, environmental science, field research, or science outreach.

Outline your proposed activities/research at QUBS or the focus of the field course. Ensure that your proposal aligns with the mandated activities of at least one of the QUBS awards.
